

SPC HYBRID FLOORING CARE AND MAINTENANCE PROCEDURES

Beau Floor’s 7mm and 6mm SPC Hybrid Flooring is manufactured to high standards for beauty and durability. Following these simple procedures for proper care and maintenance will ensure years of product satisfaction.

Care and Maintenance

While your SPC hybrid flooring is highly resistant to stains and abrasions, we recommend the following practices as part of your floor’s normal care and maintenance in order to maximize durability and lengthen the life of your flooring.

- Place a doormat outside the exterior entrances to collect excess moisture, sand, grit, and other potentially damaging substances from being tracked onto your SPC hybrid floor.
- Use only colorfast and non-scratch carpeting or pads on your SPC hybrid floor.
- Avoid sharp or pointed objects with concentrated weight such as high heels on your floor.
- Use protective felt pads under furniture legs or wide castors under appliances levelers.
- If using a wheeled dolly to move furniture or appliances on your SPC hybrid floor, place a clean sheet or smooth plywood or other protective layer over your laminate surface.
- Rearrange furniture occasionally to maximize indentation resistance.
- Do not treat or seal your laminate floor panels after they are installed.
- Never sand, lacquer, or refinish your SPC hybrid flooring surfaces.
- In areas where the flooring comes into contact with a fire place, stove, heating system or direct sun light the floor will have a tendency to cause some expansion or shrinkage and gaps appearing. If possible protect the floor with blinds or a mat.

Routine Cleaning

- Dust, mop, or vacuum with a soft brush or wood-flooring accessory to keep your flooring clean from dust, dirt, or grit.
- A damp cloth or mop can be used without damage to the SPC hybrid panels, but do not use excessive water. Dry the floor thoroughly with a clean, soft cloth.
- Blot up spills or water from wet feet or footwear immediately with a clean, dry cloth, sponge, or paper towel. Do not allow excess liquid to remain on the surface.
- Do not use soap-based detergents, abrasive cleaners, or combined “clean and shine” products on your laminate floor.
- Do not use steel wool or other scouring pads that may scratch SPC hybrid panels.
- Do not wax or polish your SPC hybrid flooring.
- Do not steam clean or use chemicals that may damage the flooring surface.

Stubborn Spots

Use acetone or nail polish remover on stubborn substances such as tar, asphalt, paint, or oil. Wipe clean with a damp cloth.
